Project Overview

Your Minor project is an opportunity to apply the knowledge and skills you've acquired in this course to a real-world problem. It should be a focused, in-depth investigation of a topic relevant to our studies.

Topic:

Minor Project:- Create a portfolio website using HTML, CSS , JavaScript and React.js. It should have following sections in it:-

About me, 2. My skills, 3. My projects, 4. Contact me, 5. My resume(it should be download.   after creating the project, push your code on GitHub

A Personal Portfolio Website is a digital representation of an individual's professional skills, projects, and contact information. This project is designed to serve as an online resume, helping web developers, designers, and other professionals showcase their expertise and achievements.

This portfolio is built using HTML, CSS, JavaScript, and React.js, ensuring a responsive, modern, and interactive user experience. The website consists of multiple sections:

1. About Me – A brief introduction highlighting skills and expertise.

2. My Skills – A list of technologies and tools the individual is proficient in.

3. My Projects – A showcase of completed projects with brief descriptions.

4. Contact Me – Direct links to LinkedIn and email for professional networking.

The project utilizes React.js to create reusable components and enhance user interaction. CSS and Tailwind CSS are used for styling, making the website visually appealing and responsive on all devices. Additionally, the navigation bar allows seamless scrolling to different sections.

This portfolio serves as an interactive resume, enabling potential employers or clients to quickly assess the individual's capabilities and get in touch for collaboration.
